

ORWINE is a policy oriented research project, funded by the European Commission, whose overall objective is to provide a scientific background for the development of EU legislative framework and code of best practices for organic wine production and labeling.

It started in February 2006 and will get to the conclusion in May 2009. Main outcomes are already available and will be presented at the workshop.

ORWINE: SCIENTIFIC BASIS FOR EUROPEAN RULES ON ORGANIC WINE

ORWINE final results presented to the organic and wine sectors

Thursday April 2nd - from 8.30 till 13.00 a.m.

In 'BusinessEurope', Avenue de Cortenbergh 168,

Room 'Adenauer + De Gasperi', Brussels
