Policies

fostering agroecology and organic agriculture

Burkina Faso

development of the national strategy for AE and an accompanying action plan.

Progress on the national programme for the rural sector.

Policies

fostering agroecology and organic agriculture

India

natural farming is promoted as Bharatiya prakritik Krishi Paddhati Programme (BPKP). This is adopted in various Indian states.

Andhra Pradesh

first Indian state to launch a transition plan for **6 million farmers to adopt Community Managed Natural Farming** (100% natural and chemical-free agriculture by 2030).

Himachal Pradesh

the state set a target of **converting all its 961 thousand farmers families to natural farming**. As 2021, over 160 thousand farmers reported actively practising Natural Farming.

Policies

fostering agroecology and organic agriculture

Madagascar

the first law in organic was promulgated in 2020 and it will soon be adopted. The next steps will be to put policy into practice.

Nicaragua

8 years later the enactment of the Law on Agroecology and Organic Production, Nicaragua requested FAO to revise the law.

The policy was updated and formulated with key partners at national and international level.

INTERNATIONAL

The Philippines

an amendment to the Organic Agriculture Act was signed into law, recognizing the crucial role of smallholders in providing safe, affordable and accessible food.

Uganda

since the launch of the National Organic Agriculture Policy (NOAP) in 2019, steps in Uganda have been taken towards implementing the NOAP by consolidating a roadmap.

Pathways toward 100% organic

01

Bhutan

The National Organic Flagship Programme was launched in 2019 to accelerate and stimulate the organic sector to achieve the set goal of being the first country to fully convert to OA by 2035.

02

Karnali province in Nepal

The federal government has formed a high-level task force and developed a guideline to promote OA in Nepal to achieve the goal of complete transformation of the area into organic.

03

Peru

the Huancavelica Organica Programme:

The initiative aims to improving access to support services for organic agricultural production development.

04

Togo

The government published a concept note for the national conversion of the agricultural sector to organic.

05

Sri Lanka

Sri Lanka's president announced the intention to gradually shift the country to farming practices to be organic.

Revision of regulations

Countries and regions going through significant revisions include:

01

European Union

regulation 2018/848,
into force since 2022.

02

New Zealand

a new Bill to cover
national, export and
import markets. Ongoing.

03

Peru

ongoing discussion to revise
the law, especially for PGS
requirements.

Standards and equivalence

Standards and equivalence

Regions going through significant revisions of standards and equivalence agreements include:

US

changes to the rule "Strengthening Organic Enforcement". This will impact the **production, handling and marketing of organic products, including grower groups requirements.**

US/India

the National Organic Program (NOP) in the US ended the equivalence agreement with India. **From July 2022 onwards, operators will need to be certified by a NOP accredited CB in order to export to the US.**

Eurasian
Economic Union

member States signed a roadmap that aims **to start the harmonisation process of organic regulations and standards** within the Union.

Thank you!
